

CONFIDENTIAL CLIENT OPPORTUNITY · INDEPENDENT CANDIDATE MATERIALS

EXECUTIVE PROFILE

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. More than two decades across advanced manufacturing, high-reliability engineering, scaled operations, automation, AI workflow design, governance, and cross-functional delivery.

ROLE-ALIGNED CAPABILITIES

Enterprise AI strategy & roadmap	Portfolio intake & prioritization	Solution delivery & operating ownership	AI governance & human authority
Build-vs-buy & vendor evaluation	Architecture-to-work translation	Adoption, change & standard work	Value realization & executive cadence

PROFESSIONAL EXPERIENCE

Vape-Jet 2025–Present

Director of Operations

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth 2017–Present

Founder / AI and Automation Advisor

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Amazon 2014–2018

Operations Management / Site Leader

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics 2000–2013

Director of Operations and Engineering Management

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles and delivered technical talks.

PROFESSIONAL EXPERIENCE • CONTINUED

Cardinal Building Products 2021–2023

Regional Director

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu 2018–2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

ADDITIONAL LEADERSHIP

Enviro Social Capital • Chairman of the Board, 2014–2017

Co-founded and led a public-private impact initiative; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green infrastructure.

IEEE • CMPT and EDS Pittsburgh Chapter Chair, 2012–2016

Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

EDUCATION & CREDENTIALS

University of Pittsburgh

Bachelor of Science; academic grounding in materials science, physical chemistry, and biology-related studies.

- Google AI Essentials
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

TECHNICAL & OPERATING TOOLKIT

Agentic AI • LLM workflows • RAG patterns • Human-in-the-loop design • Python • SQL • JavaScript • TensorFlow • Tableau • ERP/Odoo workflows • Jira • Confluence • HubSpot • Slack • GIS and mapping workflows • Lean • Gemba • quality systems • standard work • root cause • vendor and stakeholder coordination

ENTERPRISE AI DELIVERY MECHANISMS

Portfolio decisions

Value, feasibility, readiness, adoption burden, reuse, time-to-value, and explicit fund / condition / hold / stop logic.

Governed workflow design

Structured context, retrieval, human judgment, escalation, decision records, evaluation, and governance rails.

Operating delivery

Standard work, visual management, quality systems, root cause, risk escalation, training, and accountable operating cadence.

Enterprise translation

Connect business outcomes to architecture, integrations, vendors, ERP/CRM/ collaboration systems, telemetry, and lifecycle ownership.

POSITIONING BOUNDARY

This résumé does not claim prior ownership of a Fortune 500 global AI portfolio, a production Microsoft Fabric estate, or equivalent tenure as a career enterprise architect. It presents verified operating, manufacturing, delivery, governance, and AI-workflow evidence relevant to the mandate.
